Temperature Tips

Need to cool down?

- Turn off lights and electronics when not in use.
- Use fans instead of air conditioning.
- Open windows during the day to let in natural light and fresh air.
- Use energy efficient light bulbs.
- Seal air leaks around windows and doors.
- Use programmable thermostats to automatically adjust the temperature when you're not in the building.
- Use energy efficient appliances.

Feeling chilly?

- Turn off lights and electronics when not in use.
- Use fans instead of air conditioning.
- Open windows during the day to let in natural light and fresh air.
- Use energy efficient light bulbs.
- Seal air leaks around windows and doors.
- Use programmable thermostats to automatically adjust the temperature when you're not in the building.
- Use energy efficient appliances.
